PersProfile Cloud takes off...

... PersProfile Manager for large-scale behaviour evaluation

PersProfile Manager is widely recognized as an effective tool for the evaluation of social skills of individuals and teams, according to their behaviour type.

Using the Cloud technique **PersProfile Cloud** widens the scope of **PersProfile Manager** for handling large-scale evaluations.

PersProfile Cloud is therefore not a « new » test but offers an alternative to handle evaluations on a large-scale, using the evaluation process with a high degree of automation.

Practical aspects
♦ Multi-language applications.
♦ Concise and easy-to-understand commentaries.
♦ Meaningful graphics.
♦ Transmission of results either to ftp-server or by E-Mail.

The aim of PersProfile Cloud:
· To allow heavy users to obtain evaluation results without necessarily requiring all the functions and features of a PersProfile Manager licence.

Typical profile of PersProfile Cloud user :
· Large-scale high-volume business.
· Application requiring a high degree of automation.

How PersProfile Cloud works :
1. The candidate is invited to answer the PersProfile Manager test.
2. The candidate answers the test on-line.
3. As soon as the candidate has completed the test the result reaches the client's server, or is forwarded to the appropriate recipient(s), in the requisite language and format.

Characteristics of PersProfile Cloud:
♦ High velocity transmission: less than 15 minutes between the start of the test and the arrival of the results on the client's server.

♦ The client can modify the format of the results file beforehand ; language selection, candidate's file and/or assessor, the list of questions to be asked, etc.).
